## Sauna duct SGV

### Product description

SGV sauna duct is a telescopic rectangular duct with round connections at both ends. One end has a take-off with rubber gasket for the connection with ventilation duct and the second end a duct sized take-off for an exhaust air valve.

The sauna duct is installed to the wall structure.

The products are made from galvanized steel.

Products accordance with standards:

- LVS EN 1506:2007 Ventilation for buildings - Sheet metal air ducts and fittings with circular cross-section. Dimensions.
- LVS EN 10346:2015 Continuously hot-dip coated steel flat products for cold forming. Technical delivery conditions.
- LVS ISO 12944-4:1998 Corrosion protection of steel structures by protective paint systems. Corrosion class – C2.
