

LA tape

Product description

LA tape is used for sealing in HVAC systems and for insulation operations.

Construction	30 micron aluminum foil, protected with easily removable silicone paper
Type of adhesive	acrylic glue
Installation	surfaces must be clean and free of moisture and contamination
Storage	max 12 months, if stored at +21°C and relative humidity up to 50%, protected from direct sunlight
Colour	Aluminum

Technical specifications	
Properties	Value
Total thickness	70 micron
Adhesion	20 N/25mm
Tack rolling ball	20 cm
Strength	45 N/25mm
Elongation	3.0 %
Intermittent temperature	-30°C to +120°C
Constant temperature	+10°C to +40°C

Dimensions			
Product code	Width, mm	Length, m	m, kg
LA50-50	50	50	0,5
LA75-50	75	50	0,7
