

LAS tape

Product description

LAS tape is used for sealing in HVAC systems and for insulation operations.

Construction	30 micron aluminum foil with glass fiber mesh, protected with easily removable silicone paper
Type of adhesive	acrylic glue
Installation	surfaces must be clean and free of moisture and contamination
Storage	max 12 months, if stored at +21°C and relative humidity up to 50%, protected from direct sunlight
Colour	Aluminum

Technical specifications	
Properties	Value
Total thickness	170 micron
Adhesion	25 N/25mm
Tack rolling ball	15 cm
Strength	120 N/25mm
Elongation	2.0 %
Intermittent temperature	-30°C to +120°C
Constant temperature	+10°C to +40°C

Dimensions			
Product code	Width, mm	Length, m	m, kg
LAS50-50	50	50	0,6
LAS75-50	75	50	0,8
